

Share Your Pathology Results with Our Clinic

Important: How to Share Your Pathology Results with Our Clinic:

There are two ways you can share your results with me:

Option 1: Request a Copy from Your GP Simply contact your GP's office and request a copy of your recent pathology results, then email or bring them to your next appointment.

Option 2: Use the Doctor Code System (Recommended) This is the most efficient method and allows me to access your results directly. Here's how it works:

Step-by-Step Instructions:

1. When your GP gives you a pathology request form, look for the "**Copy Reports To**" section (usually located on the left-hand side of the form)
2. In this section, write your practitioner's initials: **L. Simms**
3. Add **one** of these doctor codes:
 - **Sullivan Nicolaides pathology** (usually a red form): **S16581**
 - **QML Pathology** (usually a blue form): **VSL1S**

Important Notes:

- **You need to complete this step yourself** – neither your GP nor the pathology lab will do this for you
- By using this method, **you are providing consent** for me to access your pathology results directly
- This ensures faster access to your results and more timely adjustments to your treatment plan

If you have any questions about this process or need clarification on which pathology lab to use, please don't hesitate to contact the clinic - envisionhealthoz@gmail.com .

We're here to make this as simple as possible for you.
